| Need a new | perspective?

A surreal, low-angle photograph of a road at dusk or dawn. The sky is a warm, orange-hued gradient. Numerous streetlights are visible, but instead of being mounted on poles, they appear to be hanging from the sky by thin, dark wires. A small, dark-colored car is driving away from the viewer down the center of the road. On the road surface, a large, thick white 'X' is painted, with the car positioned directly in the center of it. The overall effect is one of a dreamlike or 'vivid' perspective.
